Terex® Simplicity Low-Profile Screens

The Simplicity (LP) Low-Profile screen vibrating screen is the ideal machine for your portable plant applications. With the drive system built through the body, it gives you a compact low-profile screen.

Horizontal LP screens are available in two and three deck models in sizes of 5'x14', 5'x16', 6'x16', 6'x20' and 7'x20'.

Standard Features

Base Unit:

- Huck-bolted screen box construction (no welds).
- Bolt-on feed box with replaceable bottom liner.
- 6" discharge lips with liners.
- Abrasion resistant steel lip liners.
- Coil suspension springs.
- Rubber friction checks.
- Right hand drive standard; Left hand drive available.

Optional Equipment

- Wedge tensioning for wire cloth.
- Spray system includes a steel tube manifold and fabricated structure to support the individual spray bars to the screen base frame. Each spray bar comes complete with evenly spaced holes, spray nozzles, control valve, urethane side plate seals (non-vibrating only) and mounting clamps (vibrating only).
- Special length discharge lips. Factory needs to be consulted for lips other than standard.
- Flat decks for modular media.
- Rubber cross member protectors.
