

TEREX® | SIMPLICITY

Terex® Simplicity Vibrating Grizzly Feeders

Simplicity Grizzly feeders are heavy-duty pan feeders with Grizzly sections added to the pan surface. They perform both scalping and feeding in a single unit and are designed for impact loading and heavy burdens. Standard Grizzly feeder sizes range from 24" x 8' to 86" x 28'. The grizzly feeder reduces maintenance and capital costs by scalping only large material to your crusher or rip rap pile, while fines pass through the grizzlies to be screened or discarded.

Standard Features

Base Unit:

Extra-heavy construction, deep side channels, extra-heavy cross member and filler bar sub-deck for long, reliable life.

Adjustable grizzly openings- In one or two 5' long sections.

Heavy coil spring support system.

Powerful oscillating twin shaft assembly- Reduces material bridging and assures positive feed.

Sheaves and V-belts

Thick abrasion resistant steel pan liners.

Thick abrasion resistant steel side liners.

Optional Equipment

Sloped Grizzly bars for impactor feed.

Bearing temperature monitor.
